Education

Northeastern University

Boston, MA

Computer Science and Economics, GPA: 3.9/4.0

September 2023 – Expected May 2027

- **Relevant Coursework:** Web Development, Information Retrieval, Algorithms & Data, Database Design, Object Oriented Design, Logic & Computation, App Dev, Financial Economics, Game Theory, Multivariable Calculus

Experience

Fintech Software Engineer

July 2025 – December 2025

Priceline – Booking Holdings Inc.

Norwalk, CT

- Collaborated with 5-person team to enhance transaction monitoring microservices processing **10M+** bookings.
- Implemented validation logic for offer-for-sale lookups and component reservation verification workflows.
- Developed **REST APIs** for error segmentation and used Postman, DBeaver, and SQL to validate data integrity.
- Built APIs automating financial reconciliation across **15+** payment processors, reducing processing time by **60%**.
- Optimized business logic engines and validation rules via API-driven solutions, achieving **99.9%** system uptime.

Tech Consulting Developer

January 2025 – Present

TAMID Group at Northeastern University

Boston, MA

- Developed a **full-stack** internal news platform using React, Express, and MongoDB to streamline communication.
- Integrated **real-time** stock and weather APIs using Axios to enhance platform functionality and user engagement.
- Designed a modular Express backend with structured MongoDB schemas for scalable article categorization.
- Collaborated in a **3-person agile** team, managing version control and development cycles using Git and GitHub.

Senior Counselor

June 2020 – August 2024

SummerTech at Purchase College

Purchase, NY

- Instructed **25** campers per summer ages 9–14 on Java and Python, from introductory concepts to data frames.
- Reviewed and revised **250+** camper evaluations each summer, documenting weekly academic and social progress.
- Supervised **12** junior counselors on classroom management, social dynamics, and technical communication.
- Developed a supportive environment for children with learning and social disabilities to strengthen logic skills.

Coding Tutor

May 2024 – Present

Coditum & Wyzant

Remote

- Mentored **20+** students on coding fundamentals and advanced skills across multiple programming languages.
- Focused on **project-based learning** using React, Lua, Java, Python, HTML, CSS, and JavaScript.

Projects

QuantumWealth: Portfolio Risk Analyzer | React, Node.js, Express, Recharts

Nov. 2025 – Jan. 2026

- Built full-stack React/Node.js app simulating investment risk via **Monte Carlo** methods, **10K+** simulations.
- Implemented Box-Muller transform to calculate **VaR**, Conditional VaR, Sharpe ratio, and volatility via API.
- Designed responsive UI with Tailwind CSS, Framer Motion, and Recharts visualizations for outcome distributions.

Drawdle: Daily Drawing Web App | Node.js, Express, HTML5 Canvas, SQL

Dec. 2025 – Jan. 2026

- Built full-stack app with **8 RESTful endpoints**, JWT auth, and normalized SQL schema for drawing storage.
- Developed HTML5 Canvas drawing interface with **real-time rendering**, touch support, and Axios calls.
- Implemented **bcrypt** hashing, auth middleware, and parameterized SQL queries with automated DB init.

Netflix Watch Party Organizer | Python, Flask, Scikit-learn, JavaScript

Dec. 2025 – Jan. 2026

- Built Flask web app generating personalized playlists via **K-Means clustering** across **15+** engineered features.
- Built RESTful API with **7 endpoints** for mood, pacing, genre, and viewing behavior-based content grouping.
- Applied **PCA** preserving **95%** variance with weighted feedback tuning, reducing content discovery time by **95%**.

Technical Skills

Languages: Python, Java, SQL, TypeScript, JavaScript, HTML, CSS, C, C++, Swift, Lisp

Frameworks: React, Node.js, Express, Flask, Spring Boot, Maven, Tailwind CSS, Next.js, Streamlit

Developer Tools: Git, Postman, DBeaver, Figma, Excel, Photoshop, Adobe XD, Adobe Illustrator, Blender, VS Code

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Plotly, Seaborn, Recharts, Axios, Mongoose, Framer Motion
